

REDFOX POS

VARIFOX210

The VariFOX 210 is a 14" Hybrid POS system providing the ultimate balance of mobility with the reliability and efficiency of the traditional stationary terminal. The flexibility offered by VariFOX 210 integrates easily into the Hospitality and Restaurant sectors.

Offering a greater read/write speed (200MB/s) than the standard Hard Disk Drive (116MB/s), the VariFOX 210 uses eMMC storage combined with the superior Intel BayTrail-T 3735F Quad Core Processor for first-class performance and efficiency. Consuming only 2.2W of power, the 210 is prepared for extended periods without the need to continuously swap out batteries or power banks. Fully capable of peripheral connectivity with optional MSR, cash drawer, thermal receipt printer and customer facing display.

KEY FEATURES

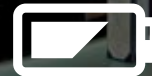

14" True Flat Wide P-CAP Touch Screen

Powered USB Ports
